RE: Wheelabrator Saugus Inc.
May 2012 DMR
NPDES Permit No. MA0028193

Dear Sir/Madam:

Wheelabrator Saugus Inc. (WSI) respectfully submits the May 2012 Discharge Monitoring Report(s) (DMR), and flow management study for the facility located at 100 Salem Turnpike, Saugus, MA 01906.

In accordance with NPDES Permit No. MA0028193, Condition I.C.2., WSI has undertaken a study to "assess the feasibility of operating down to a discharge rate of 38.9 MGD," and report its findings with the May 2011 DMR. WSI completed this requirement, and on June 15, 2011, submitted its findings to the requisite agencies. Since the findings of the initial study were inconclusive, WSI performed an additional feasibility study with the objective of coming to a more conclusive finding. Included as an attachment hereto, please find the report entitled, "Flow Management Study 2012," which details the findings of the most recent feasibility study.

Via netDMR, WSI has electronically provided said submittals to the Agency and MA Department of Environmental Protection. If you have any questions, or would prefer a hardcopy of either submittal, please do not hesitate to contact me or the facility's Environmental Manager, at 781.233.7600.

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified Personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information is submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

Sincerely,

Jai Raj Gosine
Regional Vice President
